

# UPHOME® for Integrators

We are excited to introduce our state-of-the-art building software, which seamlessly integrates hardware and software to optimize the comfort and functionality of both living and working environments.

Smart & Secure Living – Your Condo,  
Your Home, Your Control.

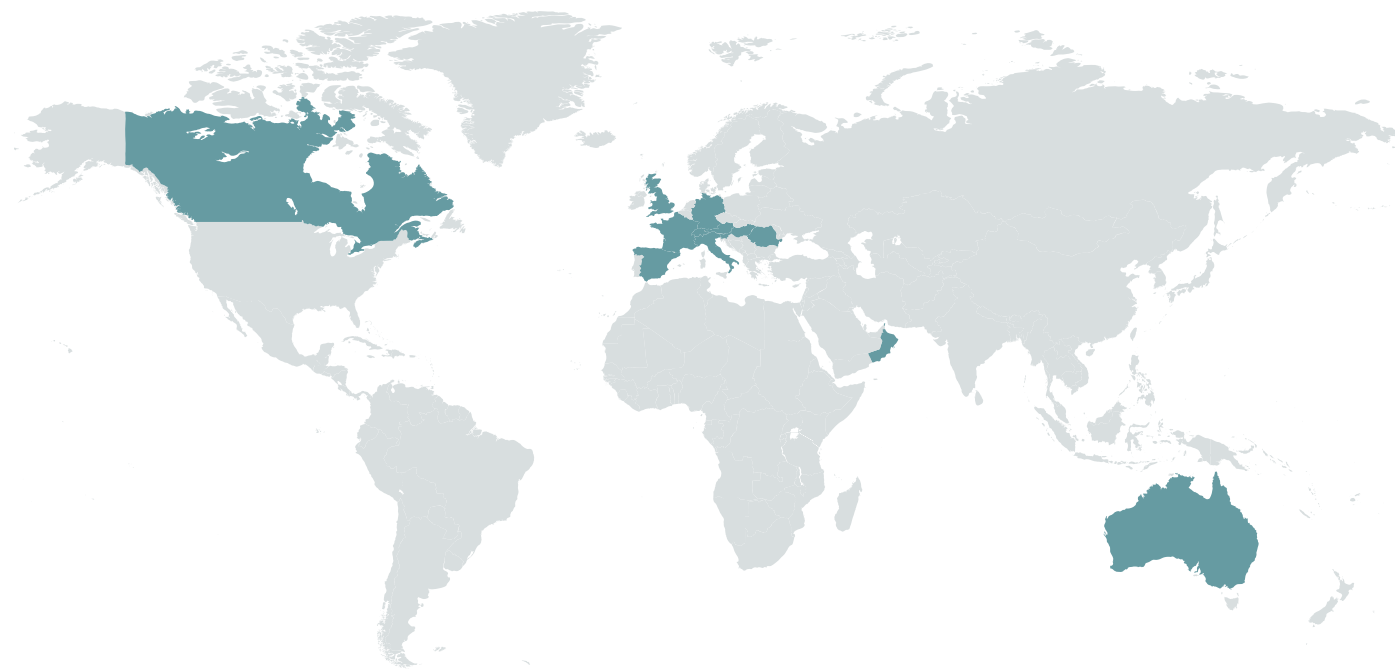

# Benefits for your business

Below, we highlight our most important services designed to benefit your business.

Our goal is to empower your expertise and help you exceed client expectations by **providing innovative and reliable building software solutions.**

- 1 **Automated interfaces** capable of replacing human resources (e.g., adding a new proxy in the cloud without an on-site visit or personal meeting)
- 2 Opportunity to transition from traditional revenues to higher, fixed, and predictable **recurring monthly revenues.**
- 3 Collaboration with the most **well-known and reliable manufacturers.**
- 4 Customizable and **marketable product interfaces** (e.g., interfaces branded with the logos of the builder or building manager).
- 5 Possibility to **sell premium packages** (additional features for access control systems tailored to residential or office environments).
- 6 A **European developed product** operating on the international market.

**Heads up!** Building automation and security are quickly becoming essential requirements. Stay ahead of the competition and equip your properties with UpHome!

**We'll gladly share our list of services**, allowing you to select the solutions that best serve your clients or business.

Additionally, **request our international reference catalog** to see which properties are already leveraging this cutting-edge technology!
