

UPHOME® for Offices

We are excited to introduce our state-of-the-art building software, which seamlessly integrates hardware and software to optimize the comfort and functionality of working environments.

Smart & Secure Living – Your Condo,
Your Home, Your Control.

Benefits for your business

Below, we highlight our most important services designed to benefit your business.

Our goal is to empower your expertise and help you exceed client expectations by **providing innovative and reliable building software solutions.**

1

A **single software solution** for tenant management, building operations, and access control tasks

2

Cost-effective, documented communication between property management and tenants

3

Efficient cost control with operational tools, such as regulating maximum office temperatures and energy consumption

4

Transparent, shared data repository to prevent tenant disputes (e.g., handover protocols, condition photos, utility meter readings, etc.)

5

Easily managed, app-based booking of shared spaces (e.g., conference rooms, guest parking)

6

Remote receptionist services, including visitor pass management with access rights, even for elevators

7

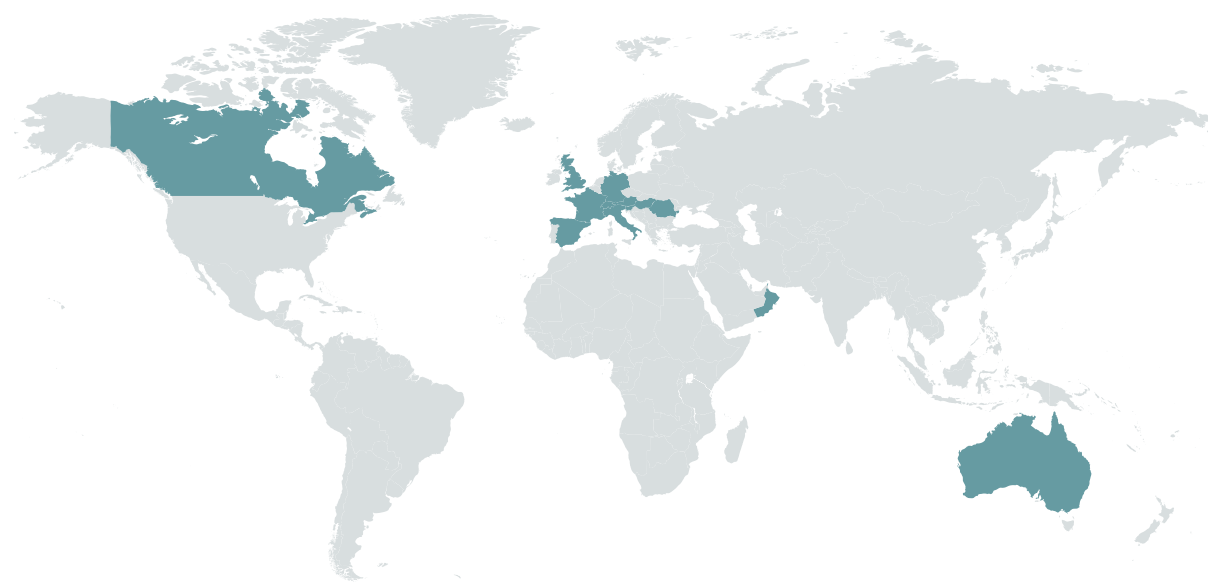

Customizable product branding for enhanced prestige value (e.g., interfaces branded with the developer's or operator's logo)

8

A **European developed product** with a strong presence in international markets

Heads up! Building automation and security are rapidly becoming essential for modern office spaces. Stay ahead of the competition and position your business to meet and exceed the expectations of tenants and employees alike.

UpHome collaborates with trusted Canadian integrator partners across various regions—contact us to get connected with a qualified contractor or let us assist your preferred partner in adopting this innovative technology, **adding even greater value to your office building projects.**

5

We are happy to share our comprehensive list of services, enabling you to **choose solutions that best fit your business needs.**

Additionally, **request our international reference catalog** to discover how other office buildings are already benefiting from this state-of-the-art technology!
